

## Why Street to Sea?

Learn about your local food webs in freshwater and marine ecosystems.

Discover how garbage on the street affects animals in our creeks, rivers, and oceans.

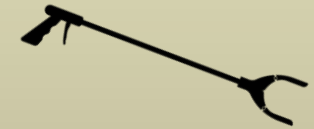

Become a watershed steward and pick up garbage before it enters our waterways!

Receive a class set of garbage pickers, reflective vests, and a scale to continue these activities after the program ends.

It's fun, educational and shows the difference we can make to protect our planet!

Learn about aquatic food webs and take action with school garbage pickups!

Watershed Education & Stewardship

Intermediate classes participate with their teachers!

## What is the cost of the Program?

The total cost of Stream of Dreams® Street to Sea is \$10 per student for a 75-minute workshop. This includes a hands-on education session and neighbourhood clean-up with all materials needed for garbage picking. Travel fees will be applied for schools more than 10km from the education team's home base. We have a minimum 3 class charge. Please ask us about fundraising, we are happy to help!

## What does the school receive?

For participating, you will receive a class set of garbage pickers, reflective vests, a digital weigh scale and a chart for tracking how much garbage your students have prevented from entering our creeks! This means that students can continue being stewards and measuring their success after the workshops end! For more information: [info@streamofdreams.org](mailto:info@streamofdreams.org)
